

# Technology that works for you!

Check processing  
made easy...

## All-in-One ORION

In 2004, Congress passed legislation to change the fundamentals of processing checks. The legislation termed "Check Clearing for the 21st Century", or Check 21, is designed to enable digital images of a paper check to substitute for the actual paper check. Check 21 processing facilitates faster funding on a wider variety of checks with fewer restrictions than ACH.

Check 21+ is a versatile payment option that fits perfectly with the 4Access Orion All-in-One Terminal.

Benefits of Check 21+ include:

- **Speed. Faster funding.**  
Merchant funded in 2-3 business days
- **Eliminates Bad Checks.**  
Eliminates trips to the bank.  
No ACH restrictions
- **Security.** Guarantee available.
- **Electronic processing** of the scanned images of the checks overcomes delivery and depositing problems. It uses the images of the check in place of the actual physical check.

### FEATURES

**Duo-Side Imager** capable of simultaneously scanning both sides of the check including the routing and account information (MICR).

**Real-time image optimization** for high quality grayscale scans of checks

**Secure confirmed image upload** via dial or Ethernet (IP)

**Large touch screen display**

Up to 20 independent merchant configurations per terminal
